

PUBLIC NOTICE

CITY OF TAYLORSVILLE TO SAVE \$4500 BY PROVIDING WATER QUALITY REPORT ON-LINE

The new procedures established by the Division of Water for the public announcement of the city's water quality report, have made it possible for the City of Taylorsville to save \$4,500 in postage by providing the information on-line. The city is still required to notify customers of the accessibility of this information on-line, and will mail the information to any customer if requested.

In order to save money, a label will be printed and attached to your June water bill each year that informs you about the availability of the report. The wording for the label is mandated and this year will read as follows:

Water Quality Report Availability

In 2012, Taylorsville Water & Sewer detected 12 contaminants in the drinking water and **none of them were above the EPA accepted level** for drinking water. Please go to www.krwa.org/2012ccr/taylorsville.pdf to view your 2012 annual water quality report and learn more about your drinking water. This report contains important information about the source and quality of your drinking water. To speak with someone about the report, please call (502) 477-3235. If you would like a paper copy of the 2012 Annual Water Quality Report mailed to your home please check the paper copy box and mail back with your payment or call (502) 477-3235. **Copies can be picked up at our office.**

This year the city improved by only having 12 contaminants. All of the contaminants are in the acceptable range of detection according to the EPA. A few examples are the chloramines and fluoride which both are used for the treatment of water before consumer usage, along with haloacetic acids and trihalomethanes which are by-products of drinking water disinfection.

The previous cost of mailing the report totaled approximately \$5,000. With the labels costing less than \$500, the city is saving \$4,500. Look for it on your next water bill !
